Fire and Rescue, Inc.

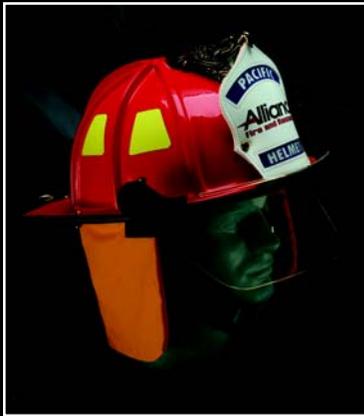

Table of Contents

An organization created to sell personal protective products that meet the needs of fire fighters and first responders.

Alliance Fire and Rescue, Inc. is now the exclusive supplier of Pacific Helmets of New Zealand, AFR Fire Gloves and Protective Apparel and other related products in the United States, Canada and Puerto Rico.

Pacific Helmets offers the ultimate in protection, flexibility, comfort, and safety. The Kevlar® helmets are lighter in weight and offer superior impact protection and heat resistance than most other popular helmets. Pacific Helmets are the only helmets that offer the optional built-in flashlight holder for improved hands free illumination.

NFPA Hoods

Alliance Fire and Rescue, Inc. uses a variety of fibers to create the highest quality knitted "sock" style hoods that provide the wearer with protection from flash fire hazards. The 2 ply construction also adds thermal insulation in cold weather conditions.

All hoods are made from fire resistant, 2 ply knit fabrics (ranging in weight from 6.5oz./sq. yd. to 8.5oz./sq. yd.) and are certified to NFPA 1971-2000 standard for structural fire fighting. The hood is 20" in total length with a back gusset that allows it to lay flat around the neck. This hood is also highly suitable for the industrial and utility marketplace. All hoods can be laundered.

ADDITIONAL FEATURES & BENEFITS:

- Knit Fabric is Breathable and One Size Fits All.
- Tunneled Elastic Face Opening - 1/2" Elastic is Encased in Fabric to Ensure Snug and Durable Fit, Especially When Wearing SCBA Masks.
- Flared Neck Design with the Gusset Provides the Best Combination of Protection, Comfort and Mobility.
- Flatlock Seams Add Strength and Extra Comfort.

AFR100NOM7

100% Nomex®

Excellent for Flash Protection and Limited Chemical Splash Protection with Superior Wear and Durability. This is Our Most Popular Hood.

AFR2080NOL7

20% Nomex®/80% Lenzing® FR

This fabric combination provides comfort and breathability and is the most cost effective solution to your NFPA requirements.

Alliance Fire and Rescue, Inc. uses a variety of fibers to create the highest quality knitted "sock" style hoods that provide the wearer with protection from flash fire hazards. The 2 ply construction also adds thermal insulation in cold weather conditions.

NFPA Hoods

AFR2080PBIL7

20% PBI/80% Lenzing® FR

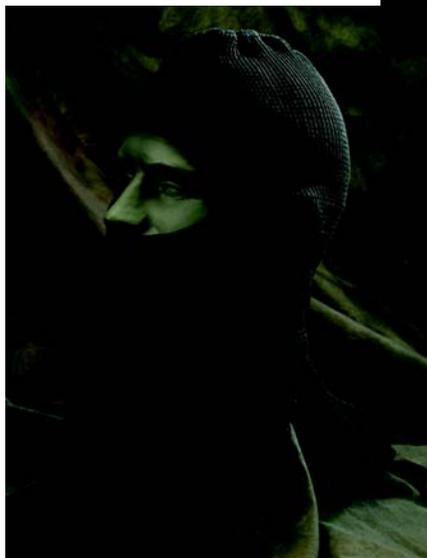

This fabric combination is light weight and breathable while providing the flash fire protection required. Lenzing® FR fiber helps reduce costs and provides greater comfort than Nomex® Hoods.

AFRP84LK7

40% P84/55% Lenzing® FR/5% Kevlar®

P84 provides a hood that is heavier yet breathable. Not only does this hood provide flash fire protection, but warmth and thermal protection in colder climates.

AFR541CTP7

50% Carbon/40% Technora/10% Blk P84

Carbon Fiber is light weight and provides excellent fire resistance.

Technora adds strength, durability, and helps hood retain its shape when laundered. P84 provides comfort and warmth in cold weather.

Disposable EMS Gloves

AFR332

FEATURES

- Disposable Nitrile
- 5 mil. Thickness
- Textured Grip
- Ambidextrous
- Contains No Natural Rubber Latex Proteins
- Packed 100 Gloves per Dispenser Box
- Industrial and Medical Grades Available
 - Style #AFR332 - Industrial Grade
 - Style #AFR331 - Medical Grade (powdered)
 - Style #AFR331PF - Medical Grade (powder-free)
- Available in Sizes S - XL

APPLICATIONS

- EMS/First Response
- Made from Component Materials Which Comply with FDA Regulations for Pharmaceutical Applications

AFR321

FEATURES

- Disposable Latex
- Medical Grade
- 5 mil. Thickness
- Textured Grip
- Ambidextrous
- Beaded Cuff
- Powdered
- Packed 100 Gloves per Dispenser Box
- Available in Sizes S - XL

APPLICATIONS

- EMS/First Response
- Made from Component Materials Which Comply with FDA Regulations for Pharmaceutical Applications

AFR346

FEATURES

- Disposable Non-Latex Synthetic
- Medical Grade
- 5 mil. Thickness
- Textured Grip
- Has the Look, Fit and Feel of Latex Without the Concern of Natural Rubber Latex Proteins
- Excellent Form Fitting Grip
- Popular in Medical Applications Replacing Latex Gloves
- Ambidextrous
- Powdered
- Packed 100 Gloves per Dispenser Box
- Available in Sizes S - XL

APPLICATIONS

- EMS/First Response
- Made from Component Materials Which Comply with FDA Regulations for Pharmaceutical Applications

Uniform/Dress Gloves

AFR650WM

FEATURES

- 100% Stretch Nylon
- Constructed in Full Fashion Pattern with Fourchettes and Set-In Thumbs for a Tailored Fit
- 3 Lines of Raised Stitching on Back
- Snap Closure
- Available in Men's and Ladies' Sizes
Style #AFR650WM - Men's
Style #AFR650WL - Ladies'

APPLICATIONS

Used for formal occasions by Police, Fire Fighters, Waiters, Marching Bands, Military and Pallbearers

AFR100WM

FEATURES

- 100% Cotton
- Constructed in Full Fashion Pattern with Fourchettes and Set-In Thumbs for a Tailored Fit
- 3 Lines of Raised Stitching on Back
- Open Cuff
- Available in sizes S - XL

APPLICATIONS

Used for formal occasions by Police, Fire Fighters, Waiters, Marching Bands, Military and Pallbearers

Police Gloves

Alliance Fire and Rescue's Police Gloves are made from Ultra Thin High Durability Top Grain Cowhide. These gloves fit like a second skin, providing excellent feel and dexterity. Each glove has an elasticized cuff for a snug fit and is available in sizes Small thru X-Large.

Alliance Fire and Rescue's Police Gloves are designed for tactical operations, crowd and disturbance control. The thick foam padding on the back of each glove is ergonomically split to improve dexterity. The thick cowhide leather construction makes these gloves extremely strong and durable. An additional layer of leather in the palm provides added protection during rapid rappels, while the unpadded index fingers allow maximum dexterity. Available in full or half finger styles.

P400

FEATURES

- Padded Back and Fingers for Shock Absorption.

P500

FEATURES

- Padded Back and Fingers for Shock Absorption.
- Half Finger Design for Finger Dexterity.

Our patrolman gloves are built to perform, providing the tactility, dexterity and durability necessary for driving, riding, conducting searches or handling firearms.

P100

FEATURES

Style P100 allows for superior feel and dexterity while shooting, searching, handcuffing or driving. The wrist-length elasticized cuff provides a very snug fit and will not interfere with your jacket or shirt cuff.

P200 P300

P200 FEATURES

Style P200 features a 100% Spectra® knit liner to protect against injury from razors, knives, and other sharp objects. The Spectra® yarn is knitted into a glove liner, which is then sewn into a premium cowhide leather shell. This glove is cut resistant, and not cut proof.

P300 FEATURES

Style P300 is a favorite of patrolmen, duty and corrections officers everywhere. It features a premium cowhide leather shell and cut resistant knit liner made of 100% Kevlar®. It provides ample dexterity for everyday duties. This glove is cut resistant, and not cut proof.

Alliance Fire and Rescue takes pride in providing only the best products available to the Fire Industry and First Responders. Our Alliance 3 and Alliance Black & Tan Structural Fire Fighting Gloves are UL certified and meet NFPA 1971/2000 Edition for Protective Ensemble for Structural Fire Fighting.

Structural Fire Gloves

AFRBR3

AFRBR4

AFRBT3

AFRBT4

FEATURES

- Eversoft Side Split Cowhide Provides Superior Grip and Tactile Sensitivity Even After Repeated Soakings
- Additional Palm and Thumb-Crotch Reinforcement in Critical Wear Area Prolongs Glove Life
- Liquid-Proof Liner Protects Against Blood-Born Pathogens and Bacteria While Remaining Flexible in Sub-Zero Temperatures
- Self Extinguishing Fiber Lining is Flame Resistant and Provides Thermal Resistance, Warmth and Comfort
- The 4" 2 Ply Kevlar® Knit Wrist with Pull Patch on the AFRBR3 and the AFRBT3 Protects the Critical Wrist Area and Creates Easy Donning and Doffing
- The Gauntlet Cuff on the AFRBR4 and the AFRBT4 Provides Better Fit in Today's New Turn-Out Gear
- Kevlar Stitching Won't Support Combustion and is 5x Stronger than Steel on an Equal Weight Basis
- Interior Leather Hang-Up Loop Facilitates Drying and Storage
- Available in Sizes XS-XXXL

The Alliance KCU1 and WCU1 Wildfire gloves are constructed of undyed grain cowhide that is specially treated for heat and water resistance. They are the ultimate wildfire gloves in comfort, dexterity and abrasion resistance and will remain flexible after repeated soakings.

Wildfire Gloves

FEATURES

- The Extra-Long Kevlar® Cuff with Leather Pull Patch on the AFRKCU1 Protects the Critical Wrist Area and Creates Easy Donning and Doffing
- The AFRWCU1 Features a Wool Cuff
- Keystone Thumb Provides Reinforcement, Comfort and Dexterity
- Kevlar Stitching Won't Support Combustion and is 5x Stronger than Steel on an Equal Weight Basis

Standard Models

FEATURES

- 360° High Visibility Flashing LED Beacons
- Portable, Safe, Easy to Use, Cost Effective (2 Cents/Hour)
- Bright Clear Colors - Red and Amber
- Up to 80 Hour Battery Life with Low Battery Indicator
- Tough and Dependable with One Year Limited Warranty

SPECIFICATIONS

Beam Colors Available • Red & Amber
 Beam Brightness • 15,000 - 25,000 millicandela
 Max Beam Conspicuity • Between Horizontal and 10° Above Horizontal
 Flash Rate • 120 Flashes per Minute
 Batteries • 2 Alkaline D Cells
 Battery Life • Up to 80 Hours at Full Brightness
 Height • 8.0 Inches (including base)
 Weight • 1.00lb. (including batteries)

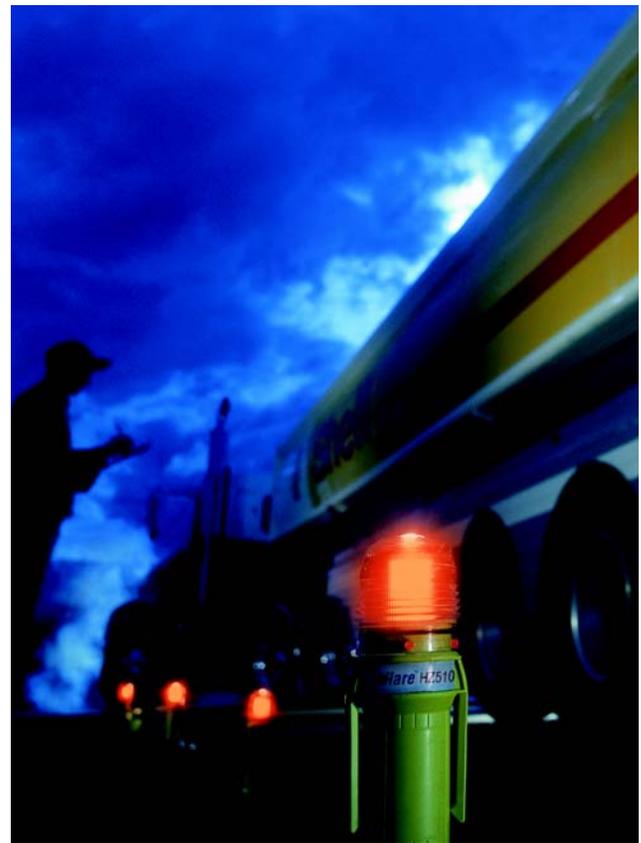

MODEL	DESCRIPTION
EF400-A	LED Flashing Beacon, Amber Color
EF400-R	LED Flashing Beacon, Red Color

HAZMAT Models

FEATURES

- 360° High Visibility LED Beacons - Flashing and Steady-On
- Portable, Safe, Easy to Use, Cost Effective (2 Cents/Hour)
- Bright Clear Colors
- Designed for Use in Class 1, Division 2/Zone 2 Hazardous Areas
- Up to 80 Hour Battery Life with Low Battery Indicator
- Tough and Dependable with One Year Limited Warranty

Helicopter Landing Zone Kits

HLZ Kits Include:

- 4 Units (Red or Amber)
- 1 Unit (Blue)
- Storage Bag
- 5 Rubber Bases
- Laminated Instruction Card

MODEL	DESCRIPTION
HZ510-A-05AB	4 Amber Units, 1 Blue Unit
HZ510-R-05RB	4 Red Units, 1 Blue Unit

SPECIFICATIONS

Beam Colors Available • Red, Amber, Blue, Green and White
 Beam Brightness • 15,000 - 25,000 millicandela
 Max Beam Conspicuity • Between Horizontal and 10° Above Horizontal
 Flash Rate • 120 Flashes per Minute
 Batteries • 2 Alkaline D Cells
 Battery Life • Up to 80 Hours at Full Brightness

HZ520-W	8 LED Steady-On Beacon, White Color
HZ530-R/B	2 Color, 8 LED Flashing Beacon, Red & Blue
HZ530-R/W	2 Color, 8 LED Flashing Beacon, Red & White
HZ530-B/W	2 Color, 8 LED Flashing Beacon, Blue & White
HZ530-A/W	2 Color, 8 LED Flashing Beacon, Amber & White
HZ530-R/A	2 Color, 8 LED Flashing Beacon, Red & Amber

Eflare™ Protector: Designed and Built to Meet High Performance Standards

Professional First Response Communications

The products detailed here are part of our "Plug-and-Play" series of First Responder products. These products incorporate all of the proven quality and reliability of the McKay range of headsets and earpieces while representing excellent affordability. These products are designed to be fitted to our proven WPTT Push-To-Talk Module. The components in the McKay Radio Accessories range of two way radio earpieces and headsets have been designed and engineered in Australia using the latest in CAD CAM software.

941-6AVBH

McKay Radio Accessories dual muff headset is ideal for high ambient noise environments such as truck and ladder operations. The behind the head design allows the radio user to also wear a protective helmet, giving personnel safety protection as well as having the ability to communicate. The modular design allows compatibility with most popular portable two way radios.

STANDARD FEATURES

- Dual earmuff design giving up to 26dB Noise Attenuation.
- Active noise canceling microphone for clearer transmission.
- Modular design allows fitting to different radio platforms, also aircraft.
- Protective nylon carry case included.

941-11FSESTA5

The McKay Bone conduction microphone system is especially useful for fire applications where breathing apparatus is required. The comfortable earpiece is inserted in the ear canal providing both receipt and transmission of audio. When hooked to the 940-3001 Push-to-Talk unit, the 941-11FSESTA5 is compatible with most popular portable two way radios.

STANDARD FEATURES

- Single earpiece allows both transmission and receipt of audio.
- Ideal for use with breathing apparatus and high noise areas.
- Modular design allows for personal issue of earpieces.

941-2FSTMTA5

The McKay 941-2FSTMTA5 is a two wire communications kit with a dual element throat microphone as well as a highly efficient acoustic airtube receiver. The unit is ideal for use with breathing apparatus and under protective clothing. The unit can be fitted with the modular 940-3001 to allow compatibility with most popular radio platforms.

STANDARD FEATURES

- Dual element throat microphone design gives crisp audio transmission.
- Acoustic Airtube for a comfortable fit.
- Heavy duty reinforced cabling offers rugged and reliable service.

Also Available
941-RKTA5

940-3001

The modular 940-3001 Push-to-Talk unit allows the user to fit a range of communications accessories to suit his individual requirements. The 940-3001 uses a very positive action six pin socket to fit to the earpiece or headset. The large adjustable clip on the back of the unit allows fitting to most protective clothing. The heavy duty curly cord is fitted with the appropriate connector to allow compatibility to most portable radio platforms.

STANDARD FEATURES

- Large rubber Push-to-Talk Button.
- Water and Dust proof design.
- Heavy Duty eight way adjustable clothing clip.
- Compatible with most portable radio platforms.

942-3001

The 942-3001 remote speaker microphone offers compact, rugged and reliable portable radio communications. The heavy duty polycarbonate case design is sealed to provide maximum protection against moisture. The curly cord cable is reinforced with individually insulated cores and can be fitted with connectors to allow compatibility to most portable two way radios.

STANDARD FEATURES

- Heavy duty polycarbonate case.
- Water and Dust proof design.
- Heavy Duty eight way adjustable clothing clip.

Gear Bags

Alliance Fire and Rescue, Inc. takes pride in the quality products that we offer first responders. Our selection of gear bags is no exception. Our extra-large, step in bags are ideal for all of your turn out gear and accessories. The outer shell is made of 600 denier polyester with vinyl backing for water resistance and is lined with an additional layer of 900 denier polyester to prevent water absorption and prolong lifespan. They are crafted with the highest quality metal hardware and the stitching is reinforced in all of the critical areas.
