Krill ® Lamps

The Original Electronic Lightstick

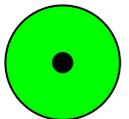

- ✓ **Simple and Reliable On/Off Switch**
- ✓ **Long Battery Life - 120 or 50 Hours per set of 2 AA batteries**
- ✓ **Long Life – Rated at over 3000 hours total use**
- ✓ **Light Weight - 3oz with Alkaline batteries**
- ✓ **Compact - 5in length, 1in diameter**
- ✓ **Soft Glow emulates chemical light sticks**
- ✓ **Impact resistant and durable**
- ✓ **Waterproof - 150feet**
- ✓ **Economical - costing pennies per hour to use**
- ✓ **6 Colors – Green (brightest), Blue, White, Yellow, Orange, Red**
- ✓ **No Liquids or Chemicals to worry about**
- ✓ **No Bulb to replace**

◆ **Original Krill ® Lamp:** Lasting over 120 hours per set of 2 AA batteries, this light replaces hundreds of chemical light sticks. It has nearly the same intensity as a chemical light stick after it has been activated for 2 hours. Lit 360°, with the exception of one small seam, the original Krill lamp has a maximum output of 5.5FL. This is perfect for replacing chemical light sticks used for marking objects where light is needed in all angles.

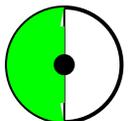

◆ **180 Krill ® Lamp:** The 180 Krill lamp has the same battery life as the Original; however, the lit surface area is minimized to 180° to produce 8.5FL which is approximately as bright as a chemical light stick after it has been activated for 1.5 hours. This is good for directional lighting and marking against flat surfaces. A piece of velcro is supplied to attach to the non-lit 180° to maximize it's potential uses.

◆ **Extreme Krill ® Lamp:** Lasting over 50 hours per set of 2 AA batteries, this light has an output of 10.5 Fl with a 360° angle of viewing. It is good for marking and lighting small areas where light is needed in all angles and is as bright as a chemical light stick after it has been activated for 1.5 hours.

360° Lamp

◆ **Extreme 180 Krill ® Lamp:** Lasting over 50 hours per set of 2 AA batteries, this lamp is the **Brightest** Krill ® lamp to date, with an output of 15.5 Fl (approximately 51Cd/m2). Comparable to a 12-hour chemical light stick after it has been activated for 1 hour. With the lit area cut down to 180°, it makes for a perfect reading light or low intensity flashlight.

180° Lamp

Micro Krill ® Lamps

The Original Electronic Lightstick

- ✓ **Simple and Reliable On/Off Switch**
- ✓ **Long Battery Life – 25+ Hours per set of 2 AAA batteries**
- ✓ **Long Life – Rated at over 3000 hours total use**
- ✓ **Light Weight – 1.3oz with Alkaline batteries**
- ✓ **Compact – 5 in length, 3/4 in diameter, same diameter as 6in glow sticks**
- ✓ **Soft Glow emulates chemical light sticks**
- ✓ **Impact resistant and durable**
- ✓ **Waterproof - 150feet**
- ✓ **Economical - costing pennies per hour to use**
- ✓ **4 Colors – Green (brightest), Blue, White, Red**
- ✓ **No Liquids or Chemicals to worry about**
- ✓ **No Bulb to replace**

- ◆ **Micro Krill ® Lamp:** This lamp is reliable and durable like the original Krill lamp yet convenient and compact enough to fit into holders and pockets designed for 6 in light sticks. By using 2 AAA batteries, the Micro Krill lamp produces over 15FL (approximately 50CD/m²) for 25 hours. It is available in green, blue, white and red.

Infra Red Krill ® Lamps

The Original Electronic Lightstick

- ✓ **Simple and Reliable On/Off Switch**
- ✓ **Long Battery Life - 50 Hours per set of 2 AA batteries**
- ✓ **Long Life – Rated at over 3000 hours total use**
- ✓ **Light Weight - 3oz with Alkaline batteries**
- ✓ **Compact - 5in length, 1in diameter**
- ✓ **Impact resistant and durable**
- ✓ **Waterproof - 150feet**
- ✓ **Economical - costing pennies per hour to use**
- ✓ **No Liquids or Chemicals to worry about**
- ✓ **No Bulb to replace**

- ◆ **Infra Red Krill ® Lamp:** With 2 AA batteries the infra red Krill lamp will last for 50 hours with a viewing angle of 360°, a positive signature of over 2000 ft and, is compatible with military NVG systems with no visible light signature. This lamp is comparable to the non-visible 8 or 3 hour IR chemical lightsticks.

XL Krill® Lamp

The Original Electronic Lightstick

- ✓ Simple and Reliable On/Off Switch
- ✓ Long Battery Life – 10+ Hours per set of 6 AA batteries
- ✓ Long Life – Rated at over 2000 hours total use
- ✓ Light Weight – less than 10oz with Alkaline batteries
- ✓ Compact – 14in length, 2 in diameter at the base
- ✓ Soft Glow emulates 10in and 15in chemical light sticks
- ✓ Impact resistant and durable
- ✓ Water resistant
- ✓ Economical – much more cost effective over large Chemical lights
- ✓ Available Colors - Green (brightest)
- ✓ Colors Available Soon - Blue, White, Red, Orange, Infrared
- ✓ No Liquids or Chemicals to worry about
- ✓ No Carbon Monoxide
- ✓ No Bulb to replace

XL Krill® Lamp: The New XL Krill® Lamp is still as durable and reliable as the regular Krill® Lamp, but bigger and better! The Larger and Brighter XL Krill® Lamp is 14 inches tall with 22 in² of light emitting material and over 20 fL of intensity! It runs on 6 AA batteries for over 10 hours & can be used for over 2500 hours. This lamp is designed to replace 10in and 15in chemical light sticks and small lanterns. The XL Krill® Lamp is available with blinking or solid output, with 360° or 180° of lit surface area and comes in a multitude of colors: Green, Blue, White, Orange, Red, and Infrared.
