14 TITANIUM STRAP GLOSSY

15 TITANIUM MATTE STRAP WITH SAFETY CLASP

17 STEEL STRAP RANGER

18 TITANIUM STRAP CLASSIC

THE COMPANY

Swiss Industry Leader

In 1918 two chemists, Walter Merz and Albert Benteli founded the company Merz & Benteli. They concentrated on the manufacture and marketing of luminous colors which were mainly supplied to the Swiss watch-making industry. In 1968, the "luminous color department" of Merz & Benteli spun off a new company. That company is today's mb-microtec.

mb-microtec is located in Niederwangen, just outside of Berne, Switzerland. Research and development were focused on this new light source, free of the known disadvantages of the traditional luminous paints. In the early 1970s, mb-microtec developed the technology to produce light sources so small, they could be installed on the hands and dial of a wristwatch.

THE TECHNOLOGY

Innovative Swiss Technology

Small glass tubes are coated on the inside with a phosphorescent material, then filled with a minute amount of tritium gas and hermetically sealed by a laser. Electrons emitted from the gas excite the material to give off a cold light. mb-microtec's ability to manufacture trigelight® (gaseous tritium light sources) are the result of decades of research in the field of radio luminescence.

trigelight® are self-activated and self-powered light sources. They function independently from a battery or any other source of outside energy. They never need recharging or servicing, and do not require the push of a button. They are 100 times brighter than anything comparable, and have a life span of up to 25 years.

THE WATCHES

Top-Quality Swiss-Made Watches

mb-microtec created the world's first Swiss-made watch with trigelight® technology. traser H3 watches are an absolute must in the emergency, safety and protection sectors, as well as in the armed forces. They are also ideal for fans of adventure and sport. traser H3 watches are top-quality Swiss watches, extremely robust and reliable.

All traser H3 watches are warranted against defects in materials and fabrication by mb-microtec for a period of two years from the date of purchase. Watches registered online at www.traserusa.com will automatically extend the warranty period to three years. The illumination system is guaranteed for 10 years. Each watch is laser-engraved with a unique serial number.
